

Laboratory Maintenance Individual Module: 22	TEL 204: Polymer Molding & Forming Department of Technology	Student Name:
--	--	---------------

Overview:

We all must share the responsibility of maintaining the Polymer laboratory. You will identify a repair or maintenance task that you can complete in approximately one hour. Your instructor has a list of tasks that need to be done. You will perform a HIGH QUALITY repair or improvement. Poorly conducted lab maintenance can actually result in more

harm and/or abuse of the lab. You will check with the instructor to find out if the task has been performed adequately. Then you will write a brief summary of the task you performed.
