--	---	---

Overview:

This laboratory only functions well if it is well taken care of. This laboratory must be cleaner when you leave than when you arrive. Use of this lab is a privilege that requires each user to be responsible for it's use and care. Each student has been assigned a clean up task. You must perform your task (and others when necessary) to restore this lab to clean, neat, organized, usable condition before you leave! A clean, organized lab is safer, more efficient, easier to maintain, and more rewarding than a facility that is not respected by its users.

Procedure:

Five times throughout the semester (or other frequency as needed), the instructor, with assistance of the clean up supervisor, will grade your ability to perform your clean up responsibilities. The evaluation will take place after you leave for the day.

THIS IS A 200 POINT MODULE !

If clean up is graded five times, then each session is worth 40 points. If there are only four spot inspections, then each will be worth 50 points, etc.

Module Grade:

Inspection One (40)	Inspection Two (40)	Inspection Three (40)	Inspection Four (40)	Inspection Five (40)
Instructor Signature:				Grade:
